Typically, when a table's dimensions are forced beyond the width of a viewport due to the content it contains, most browsers will attempt to invoke a horizontal scrollbar on the table itself. This is not the preferred DS2 standard for handling this issue. Instead, DS2 <i>Complex</i> tables utilize a show/hide column capability. When the table is in a small viewport, columns can be engineered to be hidden and revealed by the user (or by event-based system triggers). As the viewport widens and more pixels become available, columns can be (dynamically) surfaced in order to serve the user experience desired.</p> <p>See pages 5 and 6 for more information.</p> <table border="1"> <thead> <tr> <th>Monthly charges</th> <th></th> </tr> </thead> <tbody> <tr> <td>- Plan charges</td> <td>\$160.50</td> </tr> <tr> <td>BMBPNTN45OUNWUMM</td> <td>\$10.50</td> </tr> <tr> <td>Credit for BMBPNTN45OUNWUMM</td> <td>(\$5.00)</td> </tr> <tr> <td>AT&T A-List</td> <td>\$10.00</td> </tr> <tr> <td>World Connect</td> <td>\$30.00</td> </tr> <tr> <td>Credit for World Connect</td> <td>(\$5.00)</td> </tr> <tr> <td>Zoneless Officereach 400 minutes - No One Number service</td> <td>\$50.00</td> </tr> <tr> <td>Best Data pooling 2Gb for iPhone on 4G LTE</td> <td>\$10.00</td> </tr> <tr> <td>Credit Best Data pooling 2Gb for iPhone on 4G LTE</td> <td>(\$10.00)</td> </tr> <tr> <td>Integrated Messaging 1500</td> <td>\$5.00</td> </tr> <tr> <td>Credit for Integrated Messaging 1500</td> <td>(\$5.00)</td> </tr> <tr> <td>Tracking SOCD14</td> <td>(\$5.00)</td> </tr> <tr> <td>Best Data Poll IPL45</td> <td>\$10.00</td> </tr> <tr> <td>National Account Discount</td> <td>\$70.00</td> </tr> <tr> <td>BMBPNTN45OUNWUMM</td> <td>(\$5.00)</td> </tr> <tr> <td>+ AT&T monthly subscription</td> <td>\$30.50</td> </tr> <tr> <td>+ 3rd party monthly subscription</td> <td>\$20.00</td> </tr> </tbody> </table> <p>See page 7 for more information.</p>	Monthly charges		- Plan charges	\$160.50	BMBPNTN45OUNWUMM	\$10.50	Credit for BMBPNTN45OUNWUMM	(\$5.00)	AT&T A-List	\$10.00	World Connect	\$30.00	Credit for World Connect	(\$5.00)	Zoneless Officereach 400 minutes - No One Number service	\$50.00	Best Data pooling 2Gb for iPhone on 4G LTE	\$10.00	Credit Best Data pooling 2Gb for iPhone on 4G LTE	(\$10.00)	Integrated Messaging 1500	\$5.00	Credit for Integrated Messaging 1500	(\$5.00)	Tracking SOCD14	(\$5.00)	Best Data Poll IPL45	\$10.00	National Account Discount	\$70.00	BMBPNTN45OUNWUMM	(\$5.00)	+ AT&T monthly subscription	\$30.50	+ 3rd party monthly subscription	\$20.00

Determining the table's Summary classification

Consider a fictitious table containing:

Columns (min/max): 2

Column 1: Category	Column 2: Dollar amount
Rows: (variable)	

Monthly charges

Summary tables are essentially a hybrid of the Simple and Complex table types. However, a Summary table displays only (and always) 2 columns for all breakpoints. Line item details of a category are hidden from view; but can be revealed either by a user or system-triggered event.

The layers of additional functionality listed below can be applied to a Summary table in order to achieve a specific user experience and/or when certain table conditions are present.

Optional feature / functions

Optional table functionality to use for specific user experiences and/or when specified table conditions are present.

See page 9 for more information.

Table Searching
See page 12 for more information.

Zebra-stripping
Zebra-stripping on a Summary table would cause too much visual clutter.
Do not apply.

Zebra-stripping

Guidelines	Visual design
<p>Zebra-stripping is a design layer treatment that is invoked when a <i>Simple</i> or <i>Complex</i> table contains six or more rows.</p> <p>Zebra-stripping is an optional design treatment to utilize for readability.</p> <p>When Zebra-stripping has been applied to a table, the background color of the first row in the table is always white.</p> <p>If the user has expanded the Details Pane of a <i>Complex</i> table, the background of the Details Pane assumes the same background color of its parent.</p> <p>Once it is determined that Zebra-stripping is desired, the effect persists across all breakpoints and whenever a filtered result set contains 6+ records.</p>	<p>01 Alternating rows (even rows) Background color: #F2F2F2</p>  <p>The visual design section shows a table structure with alternating row colors (white and light gray). A vertical pink line with a circular node labeled '01' is positioned to the left of the table, indicating the starting point of the zebra-stripping. A mobile device icon with the text 'up to 479' is shown to the right of the table structure.</p>

Sticky headers

Guidelines

Whenever page scrolling is required to view content below a Simple or Complex table type, invoke Sticky header functionality

Sticky Header ability is persistent (as needed) across the DS2 breakpoint spectrum

Sticky headers track to the end of the last table row and then stop (instantly returning the header to the top of the table)
